A4SAP1- Implementing and Optimizing Process-Driven SAP Solutions with ARIS for SAP

INTRODUCTION

ARIS for SAP enables enterprises to define business-driven requirements from a process perspective. To implement business requirements derived from corporate strategies, companies need a fast and efficient way of mapping business processes and new business concepts to the SAP solution. This course will demonstrate how Business Process Management with ARIS and SAP Solution Manager provides procedural models, methods, technologies and reference material that make flexible and adaptable companies a reality.

BENEFITS

The aim of this training course is to familiarise delegates with the new features and functionality of ARIS Business Designer und ARIS Business Architect 7.1. You will be able to support your company's processes and structure in the best possible way with ARIS 7.1.

METHOD

A lecture, demonstration, practical exercises on the system and discussion.
