

ADD M

ARIS System Maintenance and Administration

INTRODUCTION

Correct administration of ARIS ensures a stable environment for users. This training course includes all required backup and training procedures.

BENEFITS

Upon completing this course you will be able to perform all essential installation, maintenance and administration activities in the ARIS environment. You will learn how to identify error sources without assistance and to work out solutions to problems arising in the installation and maintenance of ARIS.

METHOD

A lecture, demonstration, practical exercises on the system and discussion.

REQUIREMENTS

Knowledge of Windows, particularly of Windows Explorer and the technical administration of Windows, as well as knowledge of networks (TCP/ IP), is required. Basic ARIS knowledge would be advantageous.

COURSE CONTENT

- Technical configuration of the ARIS Design Platform
- Installation scenarios (LAN, WAN, scaling)
- Supported database systems
- Windows and Web Client
- Installation of the system
- Setup and configuration of the application server
- Setup and configuration of the various clients
- Setup and configuration of the database
- Administration of the systems in the multi-user environment
- Operation of a Microsoft-based application server
- Maintenance tasks (e.g. backup and recovery).

COURSE DURATION

One day
