**ORACLE®**

## BPA Architect Basics

### INTRODUCTION

The Oracle BPA Suite is an integrated approach to efficient business process management in your company. This course is aimed at all those dealing with corporate change related to improving business processes in projects. This could involve management through to process-owner, central organisational departments, or even people responsible in technical departments who want to use BPA for SOA-type projects.

### BENEFITS

Upon completing this training course you will be able to represent your company's processes and structures using this sophisticated toolset. You will learn how to utilise Business Process Architect and how to analyse your models through various techniques.

### METHOD

Delivered through lecture, demonstrations and practical exercises using a real case study, and open discussions.

### REQUIREMENTS

Knowledge of Windows, particularly of Windows Explorer, is required.

### COURSE DURATION

Two days.

### NOTE

This course is a prerequisite to the **BPA Architect Advanced** course which teaches additional user-interface knowledge and super-user's administrative role in BPA. This course is also a precursor to the **BPA4 Execution** workshop; converting process to BPEL for execution.

### COURSE CONTENT

- The Process Architecture-driven methodology to Enterprise Integration
- Graphic representation of corporate processes and structures
- Representing inter-relationships between models and objects
- Re-using and navigating between objects
- Ensuring model quality
- Analysing model content using reports
